

## **NT-GRS-300RF GANG RIP SAW**

The Northtech GRS300RF is a heavy duty roll feed gang rip saw available in 30-75HP. A 70mm arbor and 12" working width provide a very capable and ideal machine for higher production outputs. The carden shaft feed system is designed for lower maintenance with heavy usage compared to dip chain models at higher speeds. The Bottom arbor design raises through a sacrificial throat plate to provide excellent narrow part support. This bottom arbor design also has the capability to provide dado grooves while splitting parts, making it an excellent machine for making dunnage requiring banding grooves.

MAIN MOTOR HP: 60 HP

VOLTAGE, FREQUENCY: 230/460 Volt 60

PHASE: 3 Phase

AMP REQUIREMENT: 100/50 Amps

FEED HP: 5 HP

FEED SYSTEM: (6) Top (2) Bottom Powered Feed Wheels

DRIVE SYSTEM: Gearboxes / Carden Shaft

FEED SPEED RANGE: 12-160 FPM

ELEVATION HP: 1 HP

ELEVATION STYLE: Push Button

ELEVATION SYSTEM: Jack Screw / Guides

TOTAL MACHINE HP: 66 HP

APPROVED ELECTRICAL PARTS: CE Approved Components

DUAL VOLTAGE MOTORS: 230/460 Volt

CONTROL VOLTAGE: 220 Volt
