

NORTHTECH

NT-MPS8-2B2T MOULDING PROFILE SANDER

NT-MPS8-2B2T MOULDING PROFILE SANDER

The Northtech MBS8-2B2T is a high production (2)top and (2) bottom head sander. The 8" working with and hopper feed make it an ideal solution for narrow part sanding. Unlike traditional Wide Belt Sanders, this machine has a much smaller footprint and a much lower power consumption. Digitally positioned heads and quick slide hopper walls makes change overs quick and easy. Other configurations and designs are available.

MACHINE HP: 34-1/4 HP

VOLTAGE, FREQUENCY: 230/460 Volt 60Hz

PHASE: 3 Phase

AMP REQUIREMENT: 99/49.5 Amps

CONFIGURATION: B-B-T-T

1st HEAD: 7.5 HP Bottom Roller

2nd HEAD: 7.5 HP Bottom Combination
