

NORTHTECH

NT-MRS10X60 ROLL FEED PANEL RIP SAW 60"

The Northtech MRS1060 is our multiple rip saw for panels. A single sheet input is be turned into many smaller width out put parts in a single pass. Non marking top and bottom roll feed system glide the panel through the arbor with ease. Unlike traditional saws, this machine does not require the cost or encumbrance of an overhead crane to change out the arbors. Our special arbor cart design allows operator to do a complete arbor change in under 3 minutes. This machine can be purchased individually or with the automatic infeed and outfeed systems that will process a pack panels in under 5 minutes.
